# **Airport Spotting Guides: Europe**

£10.99

Author Matthew Falcus and Destinworld Publishing Ltd announce the release of Airport Spotting Guides Europe. Written with the travelling aviation enthusiast and photographer in mind, the book covers essential details at Europe's most popular airports for spotting.

Each featured airport has a map and detailed descriptions of spotting and photographic locations, plus information on airlines, frequencies, runways, resident stored/preserved/wrecked aircraft, and important contact details. Another interesting inclusion is a list of recommended hotels at each airport, and details of the rooms with views at each.

The book is especially geared towards aviation enthusiasts and spotters who travel around Europe to pursue their hobby, particularly making use of low-cost airlines.

This book has been put together based on visits by the author, along with accounts from local and well-travelled spotters to each airport.

Â
